**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Group I and the species propylthiouracil in Paper No. 6 is acknowledged.

Claims 6-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

Claims 3-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 6.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 16-19, 21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Corte, et al. (Gazz Med Ital Arch Aci Med, 1993, 152:149-153). The Reference Corte et al. was only available in Italian, with an English abstract, at the time this Office action was prepared, however, a translation has been requested and will be provided when it becomes available. Only the information provided in the English abstract of this reference is relied upon in this rejection.

Corte et al. disclose increasing healing of an ischemic heart in a human patient by administering propylthiouracil, after the ischemic injury occurred (see abstract). The abstract does not state that T3 and T4 levels are lowered, nor that re-epithelization occurs, however, since these properties are associated with PTU, and the method of Corte et al. comprises all of the steps of the instantly claimed method, this would be inherent to the methods disclosed by Corte et al.

Therefore, Corte et al. anticipates claims 1, 2, 16-19, 21 and 23.

Claims 1, 2, 17-20, 22 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Alpert et al. (European Heart Journal (1984) 5 (supplement F) 3-11).

Alpert et al. disclose administering propylthiouracil to a WKY rat, prior to and concomitant to wounding the heart by removing myofibrils for use in vitro experiments. Removal of this tissue would fall within the scope of a surgical incision, a cut an abrasion and a tissue punch. Alpert et al. does not state that T3 and T4 levels are lowered or that re-epithelialization occurs, however, these properties are inherent to PTU and the methods disclosed by Alpert et al. comprise all of the steps of the instantly claimed methods, therefore, this would be inherent to the methods disclosed by Alpert et al.

Therefore, Alpert et al. anticipates claims 1, 2, 17-20, 22 and 23.

### ***Claim Objections***

Claim 15 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***
